## 3 D Circuit - Connect Tech

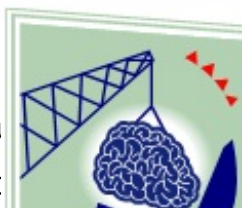

3 D Circuit is a new technology for direct structuring (LDS) process.

Traditional manufacturing process does not allow for the creation of complex shapes such as rigid circuit boards.

With our process, utilizing a laser following the 3 D contours of a part, due to a special additive in the plating process with electroplating, circuit conforms exactly to the part.

By creating a true 3 D circuit, previously unavailable. The miniaturization, reduced mass and cost. Key markets and applications include aerospace, military, RF antenna, and more. Contact us to learn about our SelectConnect™ Process in your application.

Want to learn more? At the end of the video, you will find a link to our website where you can learn more about our direct structuring process.
